CADDLE

## Methodology

A representative survey of Canadians was conducted in July 2022 and July 2023.

Sample sizes were $n=3,129$ and $n=3,087$ Canadians respectively.

Grocery categories were the focus of this study. All data presented is owned by Caddle and has a Margin of Error of $1 \%$ or lower.

# Grocery Inflation Headline in 2022 

# Grocery prices in Canada continue meteoric ascent, rising at fastest pace since 1981 <br> The Canadian Press <br> CANADIAN PRESS 

National Post, September 20, 2022

## Grocery Inflation Headline in 2023

## Canada's inflation rate is falling, so why are grocery prices still so expensive?

CTV News, August 7, 2023

## Consumers still think food is more expensive

## 92\%

Do you think food is more expensive than it was 3 months ago? July 2022

## 90\%

Do you think food is more expensive than it was 3 months ago? July 2023

## Meat remains at the most expensive category

- Meat still dominates as the most expensive food category, despite dropping 8\% from 2022 (50\%) to 2023 (42\%). Dairy Products and Fish seafood dropped as well by $3 \%$ and $1 \%$ respectively.
- The other categories have increased, notably Fruits (5\% increase) and Bakery products (4\%).

## In your view, what food categories are now

 more expensive than 3 months ago?

## Consumers are seeing more 'Shrinkflation'

- Across all specific categories there have an increase in reduction of product size with an average change of $6 \%$ where there has been an increase in reduction seen.
- Notable categories include other grocery products, bakery products and meat products.
- Meat products and fruits also had the highest change of 9\% from 2022 to 2023.

Have you noticed a reduction in product size / volume / quantity for a similar price from 3 months ago in any of the following categories?

[^0]
## Analyzing Consumer Behavior

## Consumers are reducing meat purchases even more than before

- In 2023, both Males (66\%) and Females (68\%) have reduced meat purchase than in 2022 (Males 57\%, Females 60\%).
- Amongst Generations, Baby Boomers (71\%) have reduced their meat purchases the most in 2023 from 2022 (61\%) followed by Millennials (68\%) in 2023 from 2022 (61\%).
- Topping the metropolitan areas, Calgary stood in 2023 (78\%), also experienced the biggest change from 2022 (65\%), a 13\% difference.

## Have you reduced your meat purchases in

 the last 3 months due to higher prices?

Net Change: 16\%

## Consumers are increasing the switch to private label brands

- Those who are buying more (much more/a little more) private have increased from 2022 (44\%) to 2023 (51\%)
- Driving the increase to private label are Millennials (54\%) and Generation X (51\%). Baby Boomers, however, saw the largest increase of 11\% from 2022 (36\%) to 2023 (47\%).
- Generation Z in contrast saw a 9\% reduction in private label brands from 2022 (65\%) to 2023 (55\%).
- Regionally, the Atlantic saw the biggest move to private label brands, a 17\% rise from 2022 (43\%) to 2023 (59\%).

Which best describes your purchases of grocery store brands / private labels (instead of National brands) in the last 3 months?

## Consumers are paying more attention to grocery flyers

- Those using flyers (much more/a little more) are now the majority, having increased from 2022 (49\%) to 2023 (56\%)
- All generational groups saw an increase grocery flyer usage. Millennials are the top users in 2023 (61\%), followed by Generation Z (59\%).
Generation X saw the largest increase of $11 \%$ from 2022 (49\%) to 2023 (55\%).
- Regionally, the highest usage of flyers is in the Atlantic which also experienced the highest increase, a 17\% rise from 2022 (46\%) to 2023 (63\%).

Which best describes your use of weekly grocery flyers for deals and savings in the last $\mathbf{3}$ months?

## Consumers use of coupons have increased in frequency

- The use of coupons or e-coupons (much more/a little more) increased from 2022 (48\%) to 2023 (53\%), increasing by $5 \%$. However, those consumers using them much more often increase by $7 \%$.
- Millennials overall had the highest increased usage in 2023 (59\%), followed by Generation Z (58\%). Millennials also saw the largest change of $7 \%$ from 2022 (52\%) to 2023 (59\%). Generation Z (39\%) had the highest percentage of those using coupons much more often over Millennials (35\%).
- Regionally, Ontario are using coupons more in 2023 (57\%) than any other region, with a $7 \%$ rise from 2022 (50\%).

Which best describes your use of coupons or e-coupons for groceries in the last 3 months?

## Consumers are buying more discounted products

- Overall, there is a $5 \%$ increase in Consumers buying more (much more/a little more) products near expiry/best before dates in 2023 (52\%) vs 2022 (47\%). The increase is greater for much often at (4\%).
- There is a generational contrast. Millennials and Generation X are buying more for 2023 (55\%) vs 2022 ( $51 \%$ and $47 \%$ respectively). More Generation Z are buying less for 2023 (12\%) than they did in 2022 (3\%).
- Regionally, there is a contrast as well. The Atlantic went up in 2023 (66\%) vs 2022 (50\%) vs the West which started buying less often in 2023 (9\%) vs 2022 (3\%).

Which best describes your purchases of discounted products with expiry / best before dates within a few days of purchase in the last 3 months?

## Consumers are buying more of 'Enjoy Tonight' products

- Similar to discounted products, there is a $4 \%$ increase in Consumers buying more (much more) 'Enjoy Tonight' products in 2023 (21\%) vs 2022 (17\%). However, those buying a little more have decreased.
- Millennials and Generation $Z$ are buying the most for 2023 (44\%). However, for Millennials, it is an increase from 2022 (42\%) versus a drop for Gen Z from 20023 (46\%).
- Regionally, there is a contrast as well. The Atlantic went up in 2023 (54\%) vs 2022 (46\%) vs the West which started buying less often in 2023 (15\%) vs 2022 (8\%).

Which best describes your purchases of products labeled 'Enjoy Tonight' in the last 3 months?

## Consumers are more than ever using their phone to check prices

- More consumers are using their phone to check prices (All the time/Often) in 2023 (57\%) up from 2022 (51\%) with one third using it all the time. In addition, those only using their phone rarely or never have dropped from $26 \%$ to $23 \%$.
- The younger generations, Generation Z (72\%) and Millennials (67\%) are most likely in 2023 on a regular basis, up from 2022 (62\% for both) with Generation Z having a 10\% increase. Baby Boomers trail behind at (44\%) but it still a notable jump of 7\% from 2022 (37\%).
- Ontario is the region with highest usage in 2023 (62\%), up 7\% from 2022 (55\%).

Do you use your phone while in a store to check prices of similar products at other stores?

## How Food

 Inflation Affects Spending Habits

## More Consumers are following a budget than before

- Consumers who follow a budget when grocery shopping (all the time/often) has increased from 2022 (50\%) to 2023 (55\%). At the same time, those who don't budget (rarely/never) dropped from 2022 (24\%) to 2023 (21\%).
- Among the generations, Millennials are the most likely to follow a budget in 2023 (62\%), an increase of $7 \%$ from 2022 (55\%). The least budget conscious are the Baby Boomers, with the percentage minimal changed from 2022 (47\%) to 2023 (48\%).
- All regions in Canada saw an increase in budget following consumers with the highest in Ontario in 2023 (58\%), a 7\% increase from 2022 (51\%).

## Do you follow a budget when grocery shopping?

## Unravelling the Impact of Food Prices

## How Canadian consumers are perceiving and responding to food prices

Consumers are conscious of 'shrinkflation' more than ever, with increase as much as 9\% for some categories compared to 2022.

Consumers are more budget conscious than before.

Bringing a calculator, more consumers are on a budget, putting limits on their grocery spend.

## How Canadian consumers are perceiving and responding to food prices

## Appendix

## All categories dropped as

 being more expensive in the past 3 months- There was a general reduction across categories when compared to 2022 with an average reduction of 10\%
- More than half of consumers generally still think each category is higher priced. The most notable is meat, fruit and vegetables, with this trend carrying over since 2022.

In your view, what food categories are now more expensive than 3 months ago?

## Analyzing Consumer Behavior

## How we analyzed Consumer Behavior and Spending Habits

To analyze the changes, we did a straightforward delta calculation looking at the difference between July 2023 vs July 2022.

Change \% = July 2023 \% - July 2022 \%
For 5 pt scales, we also viewed the top 2 box and bottom 2 box scores to overall positive and negative scores. Example below:

I'm buying much more
I'm buying a little
$21 \%$
$26 \%$ Top 2 Box 47\%
My purchases haven't changed
43\%
I'm buying a little less
I'm buying much less
In addition, we looked at the Net Change \% comparing the change \% in Top 2 Box versus the change \% in the Bottom 2 Box.

Net Change \% = Overall Top 2 Box Change \% - Overall Bottom 2 Box Change\%

## How Food

 Inflation Affects Spending Habits

## Consumers have shifted to using a calculator more often

- Consumer who used their calculators regularly (all the time/often) when grocery shopping have increased in 2023 (37\%) from 2022 (32\%) while those who use a calculator less frequently have dropped.
- Generation Z (48\%) and Millennials (46\%) are most likely in 2023 on a regular basis. Baby Boomers at the least likely generation at (26\%) but it still a significant increase of 7\% from 2022 (19\%).
- $\quad$ The Atlantic saw the highest regular usage (all the time/often) in 2023 (40\%) with also the highest jump of $15 \%$ from 2022 (25\%).

## Do you use a calculator when grocery shopping?

## Majority of Consumers still know how much they should be paying

- Overall, the majority of consumer still know how they should be paying (all the time/often) before visiting the grocery store in 2023 (74\%) with a slight uptake from 2022 (73\%)
- Generationally, the most aware are Baby Boomers (78\%) and the least aware are Generation Z (69\%) which experience a 7\% drop from 2022 (76\%). Millennials and Generation X were right on the overage for 2023 (74\%)

## Do you typically know how much you should be paying for any food product before you visit the grocery store?

## Unravelling the Impact of Food Prices

## What is the Difference after a Year?

## Cost Perception

- Although the perception of increasing prices have dampened from July 2022 to July 2023 marginally, $90 \%$ of consumers are still of the view that food prices are higher than 3 months ago.
- While less consumers have perceived increasing prices for individual grocery categories, more consumers have noticed Shrinkflation, a reduction in the size or quantity of products while the price remains the same, in every category. They understand they are getting less for the same price.
- Meat is still view as the category that is most increased in price the most (42\%) despite an $8 \%$ difference from 2022 (50\%), but Bakery items and Fruit however both moved up from 2022 by 4\% points.
- It is important to remember that we are measuring the perception of increasing prices and it does not mean that consumers find grocery finding it less expensive.

## What is the Difference after a Year?

## Consumer Behavior and Purchasing Decisions

- In 2023, more consumers than before have changed their behaviour in response to high prices. There is higher awareness of price changes, increased reading of flyers and checking on their phone to compare prices to find the best deals.
- They are changing on what they spend, shifting over to private label brands, making use of coupons and discount offers. Expensive items such as meat, saw more consumers in 2023 (67\%) reducing their purchases in the last 3 months compared to 2022 (58\%). In contrast, consumer buying more private label brands, increased from $44 \%$ to $51 \%$ in the past year.
- More consumers are definitely taking action to get the most value of their grocery dollar.

## What is the Difference after a Year?

## Consumer Spending Habits and Budgeting

- What remains largely unchanged is the consumer's awareness of their shopping costs, with a significant majority ( $90 \%$ ) indicating they are well aware of their spending.
- More consumers are also adjusting their spending habits, using a calculator and adhering to a budget in 2023 than 2022, marking a 5\% increase. Majority of consumers know what they should be paying.
- In the face of less buying power, consumers are making some decisions on what they spend and being more careful on how much they spend. The impact been seen in the increased reduction of meat purchases and the increased drive toward private label brands.
